WORKFLOW AUTOMATION WITH GENERATIVE AI
2025

GENERATIVE AI FOR PRODUCT MANAGERS
2025

GOOGLE UX DESIGN CERTIFICATE
2024

M.A. IN SOCIOLOGY
2019-2021

B.SC IN BIOTECHNOLOGY
2006 - 2009

Tools and Systems Expertise

Design and Prototyping

- Figma advanced auto layout, variables, components, interactive prototyping
- Protopie
- Framer

AI and Workflow Tools

- ChatGPT, Claude, Perplexity, Notebook LLM, Workflow automation with Generative AI

AI and Workflow Tools

- Miro, Notion, Agile environments

Professional Summary

Senior Product Designer with 8+ years of experience in B2B SaaS and enterprise platforms. I design workflow heavy systems and operational dashboards, owning problems end to end from discovery to production ready UI. Strong systems thinker with expertise in scalable design systems, AI assisted workflows, and deep collaboration with Product and Engineering.

Professional Experience

Acumant Technologies (Bizmeth Solutions merged)

Senior Product Designer | Nov 2022 – Present

- Lead design of core B2B SaaS modules from problem framing to polished prototypes
- Simplified data heavy workflows, improving task efficiency by 30%
- Defined and scaled design systems, reducing turnaround time by 35%
- Partnered closely with PMs and Engineers to ship production ready, scalable Introduced AI assisted workflows and smart defaults

Bizmeth Solutions

UI UX Designer | Mar 2018 – Oct 2022

- Designed 40+ web and mobile enterprise products
- Improved feature adoption by 25% through research driven iterations
- Reduced user errors by 20% by restructuring dashboards and flows
- Built reusable UI libraries and collaborated closely with engineering

Project Highlights

EcoPrism | ESG and Compliance Workflow Platform

Designed a structured, workflow driven enterprise platform for ESG and CSRD reporting.

- Simplified complex regulatory and reporting data into guided operational flows
- Reduced reporting effort by 40%
- Improved data accuracy and audit readiness

View Case Study

Arreglio | Operational Marketplace Platform

Designed a scalable, end to end digital operations platform solving real time visibility gaps in workshop ecosystems.

- Streamlined disconnected operational tools into a unified system
- Built dashboards and workflow modules improving turnaround time by up to 70%
- Increased enterprise client satisfaction through clearer operational insights

View Case Study

Mockorra | AI Powered Interview Simulation Platform

Designed an AI driven coaching platform simulating realistic interview environments.

- Built assistive workflows with real time feedback on confidence and clarity
- Improved candidate preparedness by 35% in pilot usage
- Explored AI driven automation and intelligent interaction patterns
