

VASINI SINGH

Senior Product Designer

+91-8417977993 | vasinisingh@gmail.com | [Linkedin](#) | [Portfolio](#)

Kanpur, UP, India

PROFESSIONAL SUMMARY

Senior Product Designer with 8+ years of experience across enterprise SaaS, B2B platforms, AI-powered workflows, and compliance-driven products. Proven ability to lead end-to-end UX for complex, multi-role systems at global scale. Deep expertise in enterprise governance workflows, RBAC design, AI-assisted UX, and design system creation. Track record of measurable impact: approximately 40% reduction in reporting effort, approximately 70% reduction in workshop turnaround time. Skilled at translating ambiguous operational challenges into intuitive, scalable digital experiences in close collaboration with PMs, engineers, and business stakeholders.

CORE COMPETENCIES

End-to-end Product Design | Enterprise SaaS and B2B Platforms | AI-Assisted UX | RBAC and Multi-Role Systems | ESG and Compliance Workflow Design | Design Systems | Information Architecture | Stakeholder Workshops | Usability Testing | Developer Collaboration | Agile Sprint Delivery | Dashboard and Analytics UX | Conversational AI and Chatbot UX | Responsive UI Design | WCAG Accessibility

SKILLS AND TOOLS

Design: Figma, FigJam, Miro, Maze, Adobe XD

Platform and AI: Microsoft Power Platform, Azure Cognitive Search, OpenAI Embeddings, Power BI, SharePoint,

PROFESSIONAL EXPERIENCE

Senior Product Designer | BetaBridge Ventures (via Acumant Technologies)

Jul 2025 – Present

Internal transfer from Acumant Technologies to BetaBridge Ventures

Owned end-to-end UX for ABB Application Knowledge Store (AKS), an enterprise knowledge and collaboration hub supporting 3 divisions with discussion forums, knowledge base lifecycle, AI-powered search, multi-role moderation workflows (Standard Users, Moderators, Admins), and real-time notification systems.

- Designed ABB Timesheet and Workforce Management platform covering timesheet submission, multi-stage approval workflows, project-wise allocation tracking, employee dashboards, and admin governance, aligned to ABB enterprise brand guidelines.
- Led UX redesign of ABB L&W support experience, replacing repetitive chatbot flows with a scalable hybrid admin workspace and improving discoverability of complex enterprise features while maintaining ABB brand consistency.
- Designed Crown Digital Command Centre, an Industry 4.0 real-time monitoring platform for high-speed beverage manufacturing across multiple plants, featuring configurable wall screens, live Grafana/Kafka-powered dashboards, vision system alerts, and plant mimics.

- Collaborated with cross-functional teams (PMs, Power Platform developers, architects), produced detailed design specs for developer handoff and QA.

Senior Product Designer | Acumant Technologies

Oct 2022 – Jun 2025

- Led design across a portfolio of B2B SaaS and AI-powered enterprise platforms; reduced reporting effort by approximately 40% and cut design-to-dev turnaround by 35%.
- Designed EcoPrism, a CSRD and ESG reporting platform replacing fragmented manual processes, delivering workflow-driven compliance experiences that reduced enterprise reporting effort by approximately 40% and improved audit readiness.
- Built CSRD Ecobot, a conversational AI compliance assistant guiding enterprise users through complex regulatory requirements within the EcoPrism ecosystem, establishing AI-assisted workflow UX capability at the company.
- Led Acumant AI Hub design, a centralized AI tools discovery platform enabling enterprise teams to adopt internal AI capabilities with minimal friction.
- Designed HR Bot AI, an AI-powered HR assistant automating leave management, policy lookups, and employee queries, measurably reducing HR team workload.
- Delivered Eureka (ABB): end-to-end suggestion management platform on Microsoft Power Platform with role-based dashboards (submitters, L1/L2 reviewers, worklist owners, admins), AI-powered similarity detection via Azure Cognitive Search and OpenAI embeddings, SLA monitoring, and integrations with Active Directory, Snowflake, ProductPlan, and Decision Focus.
- Modernized Crown's legacy Microsoft Access platform by designing request management, Kanban project boards, approval workflows, document storage, and Power BI reporting dashboards for globally distributed product design and marketing teams.
- Designed Arreglio, an end-to-end digital operations marketplace reducing workshop turnaround time by up to 70% through real-time visibility and streamlined multi-role workflows.
- Mentored 1 to 2 junior designers; led design critiques, facilitated workshops, and contributed to hiring and onboarding of design team members.
- Partnered with engineers to validate feasibility, ensure accessible and responsive implementations (WCAG), and deliver high-quality design specs through structured agile sprint cycles.

UI/UX Designer | Bizmeth Solutions

Mar 2018 – Oct 2022

- Designed 40+ web and mobile products across healthcare, manufacturing, and enterprise; improved user engagement by up to 25% and reduced errors by approximately 20%.
- Designed healthcare web and mobile platforms by translating complex clinical workflows into intuitive dashboards, reducing support queries through clear interaction design and accessible UI.
- Delivered manufacturing and industrial enterprise tools by streamlining operator workflows, reducing user errors through usability testing cycles, and improving feature adoption via iterative design.
- Established reusable component libraries and design patterns that scaled across multiple client engagements and product modules.
- Presented design solutions to senior stakeholders and clients; iterated based on feedback and business constraints.

Community Manager | Chhanv Foundation (NGO)

May 2015 – Feb 2018

- Full-time social impact role supporting acid attack survivors through program management, community building, and digital communications.
- Managed social media strategy and content across platforms, growing community engagement and raising awareness for survivor rehabilitation programs.

- Coordinated cross-functional operations including events, partner communications, and stakeholder reporting.
- Applied content design and communication principles to improve accessibility and clarity of outreach materials for diverse audiences.

Senior Back Office Executive | SKUNG COMMXPERTS LIMITED

Feb 2011 – Apr 2015

- Managed back-office operations, data management, and process coordination for client accounts.
- Supported administrative workflows, client communications, and internal reporting in a fast-paced service environment.

Back Office Executive | Chuknoo Securities Limited

Jan 2010 – Jan 2011

- Handled data entry, document management, and operational support for securities and financial services workflows.

HACKATHON PROJECTS

MockOraa

AI-powered mock interview platform for career readiness. Designed conversational AI avatars, personalized feedback systems, and progress tracking to help job seekers build interview confidence. Reduced role confusion by approximately 40%. Built with Figma, FigJam, Miro, Maze.

WorkMark

AI-powered performance intelligence and employee recognition platform for B2B SaaS organizations. Designed contribution dashboards, evidence intelligence workflows, recognition feeds, and organizational analytics for employees, managers, HR, and leadership.
